# Dictating LATEX using Mathfly

### Mike Roberts

### January 26, 2019

## Contents

1	Introduction	1
2	Bibliography management	2
3	Document classes	2
4	Packages	2
5	Environments	3
6	Commands6.1 With arguments	4 4 5
7	Greek letters	5
8	Mathematical symbols	6
9	Templates	8

## 1 Introduction

All of these commands can be modified or added to by editing "config/latex.toml" or using the voice command "configure latex".

# 2 Bibliography management

Once you have added the location of your .bib file (using regular slashes) to your LaTeX config file, Mathfly includes a number of commands to make bibliography management easy:

Insert my (bib resource — bibliography)

Add paper to bibliography

\addbibresource{your\_bibliography.bib}

Searches google scholar for the highlighted text (paper title), appends the first resulting bib-TeX citation to your bibliography file and adds the tag to the clipboard, ready to be pasted

into a document.

Add book to bibliography

Same as above, but searches

goodreads instead.

Add link to bibliography

Same as above, but constructs a citation from a url instead.

(edit — open) bibliography

Opens your .bib file in your text editor, for manual alter-

ations and searching.

#### 3 Document classes

Prefixed by "document class", these commands produce for example:

\documentclass{article}

article article
beamer beamer
book book
letter letter
proceedings proc
report report

### 4 Packages

Prefixed by "use package", these commands produce for example:

\usepackage{geometry}

The second column represents additional arguments.

AMC math		AMC math
AMS math		AMS math
bib latex	[style=authoryear]	biblatex
colour		color
geometry		geometry
hyper ref		hyperref
graphic X		graphicx
math tools		mathtools
multi col		multicol
long table		longtable
tabular X		tabularx
X color		xcolor
wrap figure		wrapfig

# 5 Environments

Prefixed by "begin", these commands produce for example

\begin{abstract}
\end{abstract}

The third column represents additional arguments.

abstract	abstract	
add margin	addmargin	
center	center	
columns	columns	
description	description	
document	document	
(enumerate — numbered list)	enumerate	
equation	equation	
figure	figure	[h!]
flush left	flushleft	
flush right	flushright	
frame	frame	
(list — itemise)	itemize	
mini page	minipage	
multi (cols — columns)	multicols	{2}
quotation	quotation	
quote	quote	
table	table	[h!]
long table	longtable	$\{lll\}$

 $\begin{array}{ccc} tabular & tabular & \{llll\} \\ tabular & tabular & X & \{l \ X\} \end{array}$ 

title page titlepage verbatim verse titlepage verbatim

wrap figure wrapfigure

#### 6 Commands

All of these commands are prefixed with "insert".

#### 6.1 With arguments

These commands finish in a set of curly brackets, ready for an argument, for example " $\arrowvert$ "

author author

[add] bib resource addbibresource

caption caption
chapter chapter
frame title frametitle
footnote footnote text footnoteetxt[]
graphics path

[include] graphics includegraphics[width=1\textwidth]

label label

 $new command {\}[]}$ 

paragraph paren cite part part part part reference part

renew command renewcommand sub paragraph subparagraph

(section — heading) section sub (section — heading) subsection sub sub (section — heading) subsubsection

text cite textcite
[text] bold textbf
[text] italics textit
[text] slanted textsl

title title use theme usetheme

#### 6.2 No arguments

For example " $\l$ linebreak".

centering centering  $\operatorname{column}\{0.5\backslash\operatorname{textwidth}\}$ column footnote mark footnotemark[] horizontal line hline linebreak line break item item make title maketitle new page newpage noindent no indent page break pagebreak print bibliography printbibliography table of contents tableofcontents text backslash textbackslash textwidth text width vertical line vline

### 7 Greek letters

Prefixed by "greek".

alpha  $\alpha$ beater β Γ gamma  $\delta$  $\Delta$ delta epsilon zita ζ eater  $\eta$  $\theta$ theta Θ iota kappa  $\kappa$ lambda  $\lambda$ Λ mu  $\mu$ new  $\nu$ ξ Ξ zee

pie П row  $\rho$  $\sum$  $\operatorname{sigma}$ tau upsilon Υ phi Φ  $\operatorname{chi}$  $\chi$  $\Psi$ sigh  $\Omega$ omega

# 8 Mathematical symbols

Prefixed with "symbol".

square root	$\sqrt{a}$
[generic] root	$\sqrt[n]{a}$
integral	ſ
double integral	Ĵſ
triple integral	ĴĴſ
infinity	$\infty$
times	×
divide	÷
intersection	$\cap$
union	$\bigcup$
stop	
sum	$\sum$
product	$\sum_{\prod}$
(direct sum — oh plus)	$\oplus$
(large direct sum — large oh plus)	$\oplus$
plus or minus	+
partial	$\partial$
fraction	$\frac{a}{b}$
binomial	$\frac{1}{\partial}$ $\frac{a}{b}$ $\binom{a}{b}$
sine	$\sin$
cosine	cos
tangent	tan
secant	sec
cosecant	$\csc$
cotangent	cot
arc sine	arcsin

```
arc cosine
                                                  arccos
arc tan
                                                  arctan
hyperbolic sine
                                                  sinh
hyperbolic cosine
                                                  \cosh
hyperbolic cotangent
                                                  coth
hyperbolic tangent
                                                  tanh
argument
                                                  arg
modulus
                                                  \operatorname{mod}
degree
                                                  deg
determinant
                                                  det
dimension
                                                  \dim
exp
                                                  exp
GCD
                                                  gcd
cat hom
                                                  hom
kernel
                                                  ker
infimum
                                                  inf
supremum
                                                  sup
limit
                                                  \lim
liminf
                                                  lim inf
(natural (log — logarithm) — log natural)
                                                 ln
logarithm
                                                  log
max
                                                  max
min
                                                  min
probability
                                                  \Pr
[is] not equal [to]
                                                  \neq
                                                  >
<
[is] greater [than] [or] equal [to]
[is] less [than] [or] equal [to]
[is] approximately [equal] [to]
                                                  \approx
proportional [to]
                                                  \propto
preference less [than]
                                                 A T T U U U T Y IX
preference less equals
preference greater [than]
preference greater equals
subset
superset
strict subset
strict superset
member
(land—logic and)
                                                  \wedge
                                                  \bigvee

### 9 Templates

Templates provide a way to insert larger sections of text into your documents, for example you may have a particular set of packages which you always want to import at the head of your files, or a particular diagram which you need to draw over and over again. They are defined in the templates section of config/latex.toml And by default are executed using the "template itemplate\_name;" command. A couple are included as standard for illustrative purposes but these are designed to be edited to suit your needs. For example, the command "template wrap figure" will insert:

```
\begin{wrapfigure}{1}{0.5\textwidth}
\centering
\label{}
\includegraphics[width=0.4\textwidth]{}
\caption{}
\end{wrapfigure}
```
